

Change Log

Product Version: **8.1.0.5**

Date: **09/19/2016**

Maintenance Issues Resolved in 8.1.0.5

ID	Content Matrix Edition	Title	Support Ticket Id
194631	SharePoint	When migrating from SP 2010 (MEWS) to SP 2013 (MEWS), Content Query web parts are missing data and an exception is thrown when trying to edit the same web part.	00086146, 00119250
194815	Organizer	After activating Organizer features the Event Viewer is listing an error occurring while checking to see if the user account is a member of the Organizer Ribbon Users group.	00083056, 00082558, 00096920, 00121236
201844	SharePoint	Migrating custom lists to SPO is throwing an exception when there are more than 8 lookup type columns (Person or Group, MMD, Lookup, etc.) on the list.	00092481, 00094397, 00104015, 00109613

204506	SharePoint	There is a difference between the number of failures reported on the Summary screen during migration and the reported number of failures in the migration logs post-migration.	00110253
206303	SharePoint	When running a separate "Paste Permissions" action the migration will return exceptions for "Removing all role assignments failed".	00108198
209319	SharePoint	The Body section for Announcement web parts does not display correctly when migrating from SP 2007 to SP 2013.	00107978
209608	SharePoint	Copying groups from SP 2010 to SPO results in an error when the group name contains '&' (ampersand) characters.	00110889
210628	SharePoint	After migrating from SP 2010 to SPO the Contact Webpart is empty.	00114629
210681	SharePoint	If a 'People or Group' column is connected to a SharePoint Group that has additional site columns, after migration the SharePoint Group's associations will not be preserved.	00112353
214043	SharePoint	Running an incremental copy that includes Calendars with overlays results in the overlays being duplicated.	00113407
215300	SharePoint	All Documents fail to copy and return a false error message for missing "Required Properties " when migrating a document library with minor versions enabled, even though all Metadata is correctly filled.	00116033
220326	SharePoint	When running an incremental copy to update only the 'Core Metadata' for a list that has versioning enabled the items do not appear to be updated.	00116698
223249	SharePoint	When migrating Community Site from SP 2013 to SP 2013 (on premise) the hidden properties for the members list is not preserved.	00120698

223251	SharePoint	When migrating Community Site from SP 2013 to SP 2013 (on premise) the “What's New” web part does not retain values for members and replies.	00120898
223420	SharePoint	An exception is thrown for the ‘applying content types’ and ‘pasting List Forms’ actions, when copying the content type resource folder, resulting in items failing to migrate.	00120757
223935	SharePoint	When running copy of a Community Site the ‘Categories List’ is getting duplicated for Incremental copies, and not all categories are added for a Full copy.	00119427
223937	SharePoint	When migrating the ‘Discussions List’ for a Community Site any missing users are being set with the migrating account instead of any user account that is specified in the ‘Map missing users to’ option.	00120788
224033	SharePoint	When migrating a ‘Pictures Library’ the Approval status for items/documents is not preserved.	00120894
224524	SharePoint	Preserve SharePoint Document IDs not functioning for migrations to SPO	00121223
224958	SharePoint	Migrating a Document Library from a SP on-prem MySite to SPO using the Azure migration options results in an additional folder called ‘Attachments’ being created in the target Document Library (on a non MySite site template).	00120341
226668	SharePoint	An error “LicenseProvider instance is already initialized and cannot be re-initialized” is thrown when calling a cmdlet from transformer .	00121146
227299	SharePoint	Migrating Lists/Libraries with a large number of version from SP 2007 to SPO results in some of the items failing with a “File not found” error.	00117461

234086	SharePoint	Migrating a Community Site from SP 2016 (OM) to SPO throws an error for copying content types.	N/A
223106	SharePoint	If a Lookup list is configured to have Unique permissions on the source, they are changed to Inherited on the target.	N/A
216801	SharePoint	In SPO when a Publishing site is created as a child under a site that doesn't have Publishing it results in an infinite loop for the site creation.	N/A
210902	Blogs & Wikis	When migrating blog posts from Confluence to SPO the post versions are duplicated.	00114357
231109	eRoom	Migrating an eRoom Room to SPO using the Paste as Site action with the 'Break inheritance and create associated groups for subsites' option results in a "An error occurred during the operation of a service method: The property or field 'Title' has not been initialized" error message.	00124637
203807	eRoom	Eroom objects fail to copy and ERoom job fails completely when copying and pasting eRoom containers as Sites to SPO or SP 2013 (CSOM).	N/A
