

Change Log

Product Version: **8.3.0.1**

Date: **05/03/2017**

Maintenance Issues Resolved in 8.3.0.1

ID / LID (Legacy ID)	Content Matrix Edition	Title	Support Ticket Id
267095	Core	[Feature] Upgrade the existing Content Matrix 'Help' file to a more updated Authoring system for general 'Easy of Use' improvements.	N/A
242449	SharePoint	[Feature] Implement a new 'Simple/Advanced' mode UI to streamline migration options, while allowing users access to the existing set of options.	N/A
226347	SharePoint	[Feature] Upgrade Content Matrix to use .Net 4.5.2 as the default version of .Net	N/A
256517	SharePoint	[Feature] Implement a 'chunking' mechanism for migrating files that are over 200 MB to SPO or SP 2016 (CSOM).	N/A
260538	SharePoint	[Feature] Add ability to preserve Column Default Value Settings for Lists and Libraries using CSOM	N/A

255481	SharePoint	Implement Exception handling while reading all the Web Parts from a Landing Page (default.aspx or home.aspx) when migrating to SPO.	00129140, 00130027
235285	SharePoint	Cannot edit or publish SharePoint Designer Workflows in SPD after migrating to SP2016 - variables in conditional statements are corrupted	00126810, 00130516
201842	SharePoint	When migrating SPD 2013 Platform Workflows Migration, any Initiation Form Parameters are not preserved and instead become Local Variables in the target side Workflow.	00104667
260735	SharePoint	Migrating Workflows from SP 2010 to SP 2013 and later throws an error when retrieving SPD/Content Type Workflow Associations with the message: String was not recognized as a valid DateTime.	00135505, 00136015
263013	SharePoint	SharePoint Designer Workflows lose associations to custom tasks and history lists when migrating as a site.	00135771
272563	SharePoint	When migrating SPD List Workflows with versions the Time is getting set with the migration time instead of preserving the Time from the source.	N/A
243198	SharePoint	Content Type resource folders and files fail to migrate if owned by deleted users and return a "User cannot be found" exception when running a "Paste List Forms" migration or "Applying Content Type" action.	00120757
250207	SharePoint	Migrating a Calendar list does not preserve the "Launch forms in a dialog" setting.	00124952, 00129808
264096 / 269462	SharePoint	After migrating from SP 2007 to SPO any migrated Metadata cannot be changed in SPO for Office 2013/2016 files (.docx, .xlsx etc.) when additional Metadata has been associated with these documents in SP 2007.	00136076
255154	SharePoint	If a Site contains a List Column and a Site Column that have the same display name, the Site Columns should be added to the list.	00076912, 00077424, 00131837
266771	SharePoint	When migrating documents to SP2013 using the CSOM adapter, any hidden document properties will appear in the edit properties form.	00137346
246802	SharePoint	When using Content Matrix on an Azure VM, users are unable to create a new Site Collection in SPO when getting the error: Message: This request operation sent to	00129228, 00130035, 00131585, 00132053

		net.pipe://localhost/CSOM2013Service8.1.0.5LTE2OTA4MzU3MzM=did not receive a reply within the configured timeout (00:15:00).	
236035	SharePoint	Migrating Wiki Home pages with many versions, results in the most recent versions not being migrated.	00126268, 00120277
236873	SharePoint	Migrating SharePoint Groups does not preserve the group description or "About Me" values.	00127275, 00130416, 00135961
252489 / 252490	SharePoint	Blog Site Categories are getting deleted on the target when running a 'Paste All Site Contents' migration when using the 'Custom Copy' settings to preserve all target data / items.	00127904
241871	SharePoint	The web parts on a Blog site home page are deleted when running a 'Paste All Site Contents' migration when using the 'Custom Copy' settings to preserve all target data / items.	00127904
181443 / 268142	SharePoint	Web Parts added to pages using Search Results page layout do not show up on the target after migrating a page.	00085289
267329	SharePoint	Error loading Search Box on target Enterprise Search Center after pasting as a Site collection with Enterprise Search Center site.	00084083
246939	SharePoint	When migrating from SPO to SP 2016, survey responses fail to copy with error: The object is associated with property ContentType.	00130457, 00130467, 00130708
246913	SharePoint	When migrating from a SP 2010 (MEWS) to SPO, if Forms based Authentication is enabled, an error is thrown for the SubAction: Paste Web Parts: The request failed with the error message: Object Moved.	00130291, 00135969, 00136298
250608	SharePoint	Navigation copy throws an exception when the URL has a mix of upper and lower case letters, and fails with the error: The remote server returned an error: (403) Forbidden.	00132146
261145	SharePoint	When migrating a Blog site to SPO, the Display name for the OOB columns 'Category' and 'Comments' is blank for Posts lists.	N/A
255969	SharePoint	Columns values for columns inside a 'Video' Content Type are not migrated from SP 2010 to SP 2013/2016/SPO (CSOM).	N/A

265385	SharePoint	When migrating a Document Library that has a parent content type of 'Picture' an exception is thrown and document versions are not fully migrated and the file remains 'Checked out' on the target.	N/A
254762	SharePoint	When migrating a List that contain a Site column and List column (and both are Choice columns), then the List column displays the values of the Site column instead of the correct values after migration.	N/A
194905	Organizer	When using the Reorganize functionality within Organizer, Users can delete site collections that they have access to even when they only have Contribute rights.	00107484
247079	Blogs & Wikis	When a Confluence page title contains special characters like ampersand or double quotes then Link Correction is not correcting links in the Child Page Hierarchy Column, which is added during a migration from Confluence to a SharePoint Pages Library.	00128760
247980	Blogs & Wikis	Links for thumbnail images that are present on confluence pages are not getting populated in link correction table after migration or Extract Link action is performed, as a result image links will still point to Confluence.	00130861
224465	Public Folder	The Content Matrix Public Folder - 32Bit executable installer does not load.	00118982, 00124416
