

Change Log

Product Version: **8.3.0.3**

Date: **06/16/2017**

Maintenance Issues Resolved in 8.3.0.3

ID / LID (Legacy ID)	Content Matrix Edition	Title	Support Ticket Id
262369	SharePoint	[Feature Request] Implement User Mapping at Domain level to include all source users without specific user mapping entry.	262369
278731	SharePoint	[Feature Request] Add ability to preserve Disabled AD Users when migrating to SharePoint Online (SPO) targets.	278731
284604	SharePoint	[Feature Request] Add ability to check the Azure account name for any Upper case characters (in the EnvironmentSettings.XML file) for manually configured Azure Containers, and convert them to lower case characters to prevent any "error: (400) Bad Request" messages.	284604
284465	SharePoint	[Feature Request] Add support for migrating DocumentSet snapshots (versions) to SharePoint Online (SPO) targets.	284465

271103	SharePoint	If migrating a Document Set to to SharePoint Online (SPO) using Azure, the document sets get migrated as Folders instead.	271103
256466	SharePoint	[Feature Request] Add support for copying Site Notebooks (the "<Site Name> Notebook" folder) when running a Site level migration of the source hierarchy structure.	256466
256477	SharePoint	[Feature Request] Add support for copying Site Notebooks (the "<Site Name> Notebook" folder) when running a List level migration.	256477
275378	SharePoint	[Feature Request] Add support for copying Site Notebooks (the "<Site Name> Notebook" folder) when running a Folder level migration.	275378
256465	SharePoint	[Feature Request] Add support for Navigation only migrations to copy and update navigation links that point to Site Notebooks.	256465
284468	SharePoint	[Feature Request] Add the ability to copy workflows during a migration at the List level to SharePoint Online (SPO), including the 'Paste Site Objects,' 'Paste List,' and 'Paste all Child Lists' actions (or similar migration actions between the site and list level options).	284468
182599	SharePoint	When migrating using the "Paste All Child Lists" action, any action that fails will not cause the remaining action(s) in the migration to also fail.	182599
